METALÚRGICA PROGRESO S.R.L.

QUALITY

Since 2006 we have ISO 9001 certification.

CAPACITY

We manufacture molds up to 30 tons.

TRAJECTORY

Since 1984, we are serving our customers.

THE BEST COMPETITIVENESS **ANYWHERE IN THE WORLD**

Our goal is to supply the best quality in tooling to every part of the world. This is our commitment. Being efficient and competent allows us to remain successfully in the globalized market. Metalúrgica Progreso S.R.L. will embrace the future by doing things better every day and taking pride in our customer's satisfaction.

Our aim is the total satisfaction of our customers through an optimal performance of the tools we produce.

VISUALIZE NEW TYPES OF **SOLUTIONS & PROCEDURES**

Since 1984 we have striven to create a working atmosphere which encourages all our contributors to visualize new types of solutions and procedures, resulting in growth and reinvestment in our business and in more profitability for our customers.

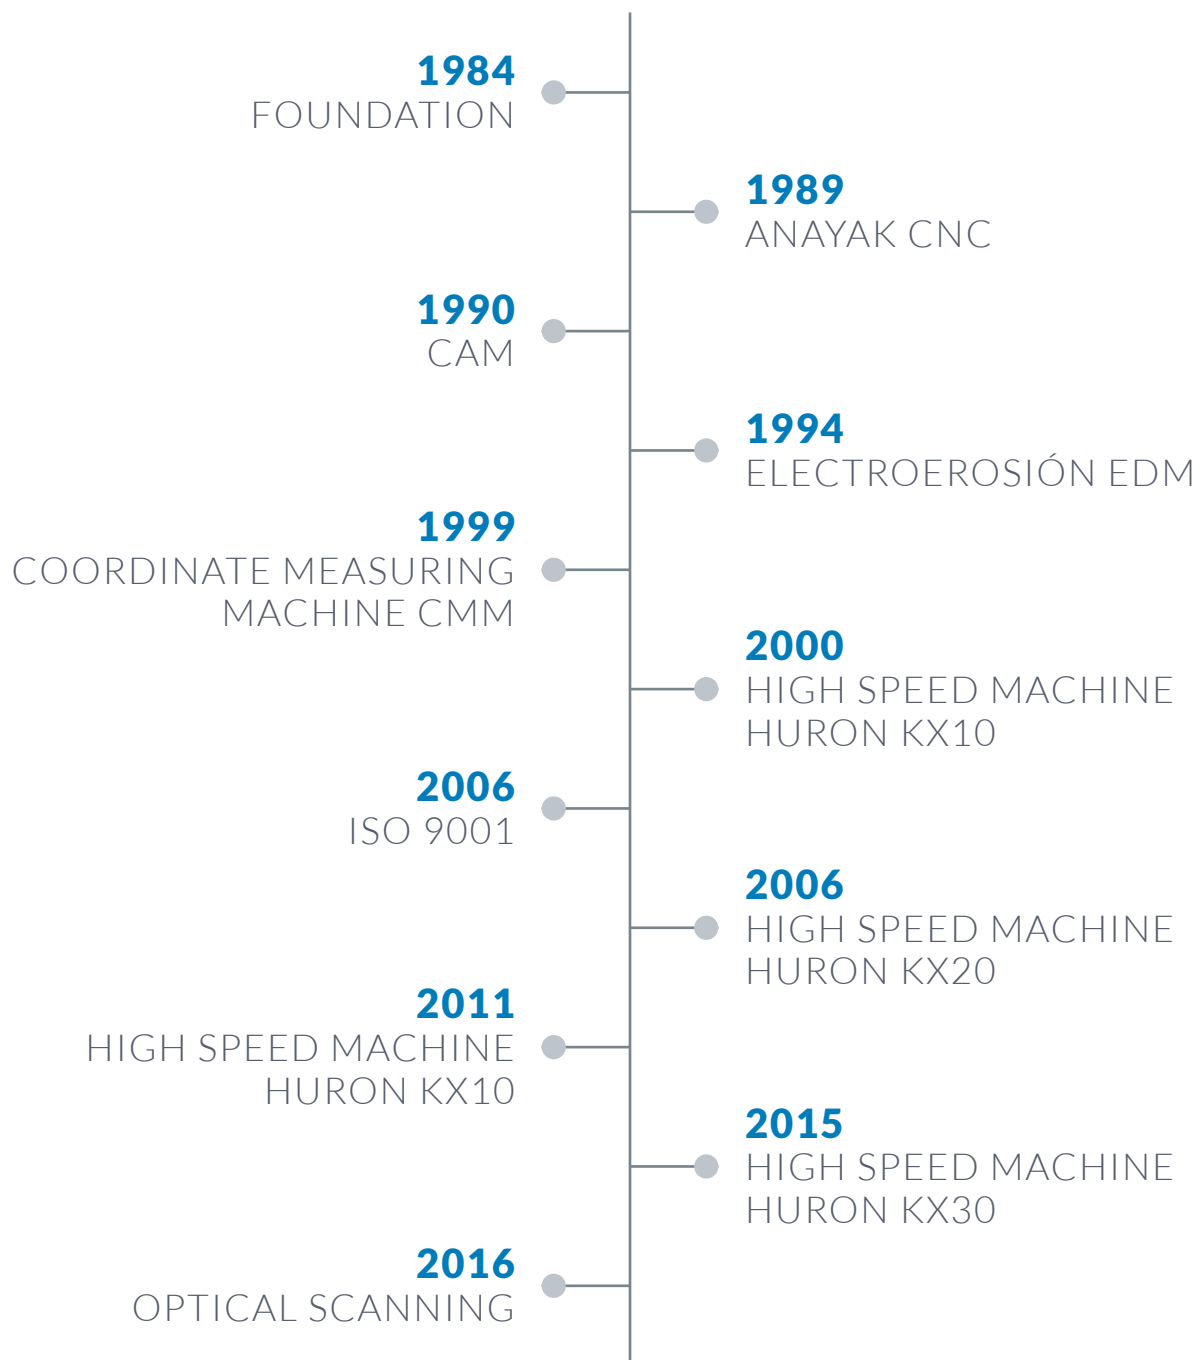

DESIGN, MANUFACTURE & DELIVERY

reflect our commitment to serve the current needs of industry. We offer all the above mentioned to the most important person...

Our Customer!

TIMELINE TECHNOLOGY X TIME

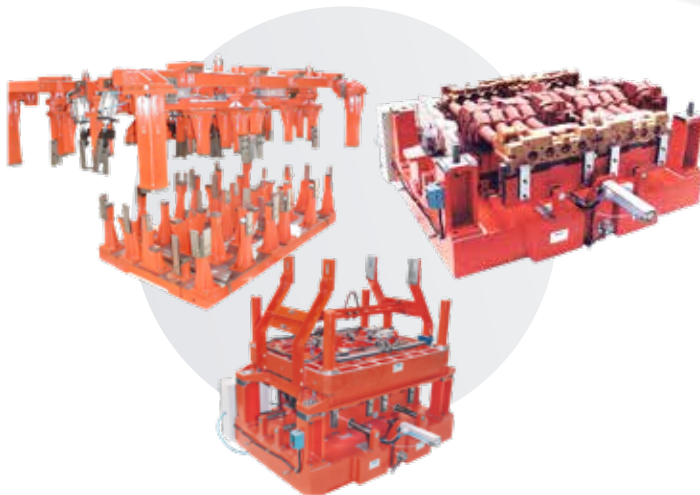

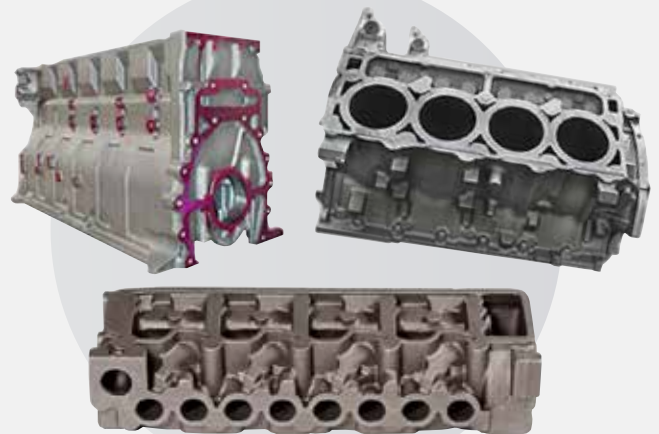

PRODUCTS

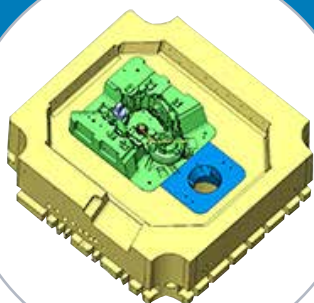

**HIGH PRESSURE DIE
CASTING MOLDS (HPDC) -
PERMANENT MOLDS FOR
GRAVITY DIE CASTING**

**PERMANENT AND
SEMI-PERMANENT
MOLDS**

DEVICES

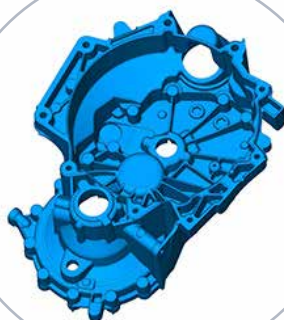

ENGINEERING

PROPER TOOL DESIGN

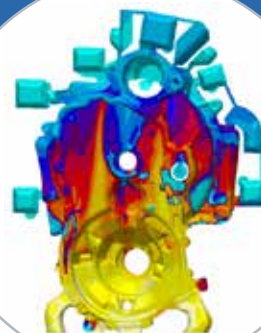

A thorough understanding of the needs of the client is the starting point for the correct design of tooling.

Proper attention to specifications results in an appropriate tooling design.

KNOWLEDGE, TRAINING & EXPERTISE

The use of all available technologies is merely the beginning. Knowledge, training, expertise and deep insight are all essential components to provide the best available in the market.

WE FACE ANY PROJECT

We currently are capable of operating any of the top CAD systems, achieving in this way, the flexibility needed to face any kind of project.

MANUFACTURING

SPEED & PRECISION

We currently have four HURON High Speed Machines, with a maximum on the table capacity of 2500 kg. This gives us a competitive edge that allows us to meet our customer's requests quickly and with the necessary precision.

QUALITY & COMPLIANCE

Although technology has increased our capacity it is the knowledge and creativity of our staff that have been the key factors backing our quality and service. This quality and corresponding performance are demanded by our major customers and major international manufacturers.

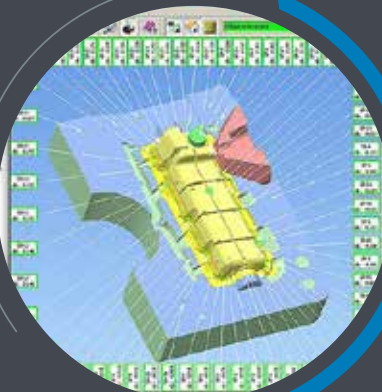

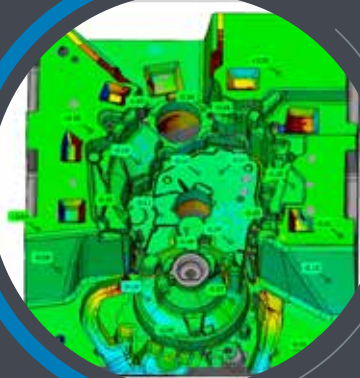

QUALITY & COMPLIANCE

Since 2006 we are ISO 9001 certified, thus reinforcing our commitment with client satisfaction.

CAPACITY & FLEXIBILITY

For Dimensional Control of our products we use a Mitutoyo Beyond 710 CMM, connected to a Delcam PowerInspect workstation. This combination provides us with an excellent combination of capacity and flexibility.
